NAMESERVERS - KEEP UNCHANGED

Type	Host	Value	Priority
NS	@	ns1.host-h.net	-
NS	@	ns2.host-h.net	-
NS	@	ns1.dns-h.com	-
NS	@	ns2.dns-h.com	-

IMPORTANT NOTES
----

1. Delete or replace A records for @, www, or mail that still point to the old AWS IP address: 13.247.245.36.

2. Do not delete or replace the existing xneelo._domainkey DKIM TXT record.

3. Do not add an IPv6/AAAA record yet.

4. Ensure the support@sportsuniverse.co.za mailbox exists in xneelo.

5. After the records propagate, configure HTTPS and production SMTP, then test Gmail and Outlook delivery and confirm SPF, DKIM, and DMARC all show PASS.
